

Home Learning Week 6

Bubble fun

Make your own bubble mixture, following the recipe below. Then use it to blow bubbles using a variety of objects. You could try using: a sieve; a slotted spoon; a pipe-cleaner bent to form a circle; a small hoop. Maybe you can think of different items to use!

Ingredients:

475ml water

15ml washing-up liquid

10ml glycerine

Equipment:

Bowl

Spoon

Container with a lid

Method

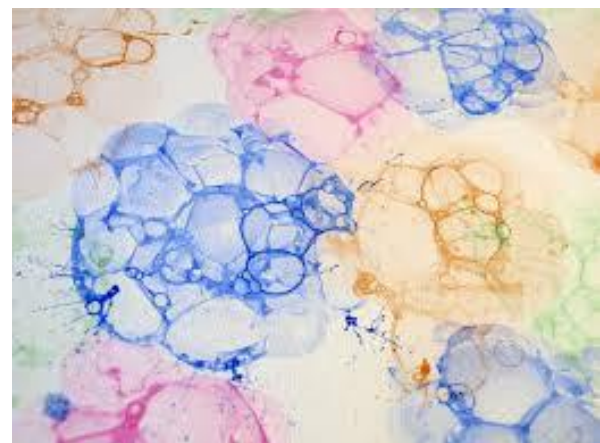

1. Pour the water into a bowl
2. Slowly stir in the washing-up liquid
3. Slowly stir in the glycerine
4. Use some of the utensils mentioned above to blow bubbles
5. Store any unused mixture in a container with a lid or use for 'bubble painting' below

Catch a bubble

Be active today. Ask an adult to blow some bubbles for you – outside if you have a safe space to run or inside if you can make room! As the bubbles float away see if you can catch them – run, jump, stretch high and bend low. How many did you catch? Take care – bubble mixture can be slippery so please make sure the surface is safe for this activity!

Bubble painting

Pour some bubble mixture into a cup or small bowl. Add your favourite colour paint or food colouring. Use a straw to blow into the mixture, creating bubbles so they build higher and higher. Now place a piece of paper over the cup / bowl 'to catch' the bubble design!

I had a Little Turtle

Watch this clip of the Little Turtle rhyme and then see if you can learn it, with the actions of course! <https://www.youtube.com/watch?v=O9bf-phvFH4>

I had a little Turtle,
His name was Tiny Tim.
I put him in the bathtub,
To see if he could swim.

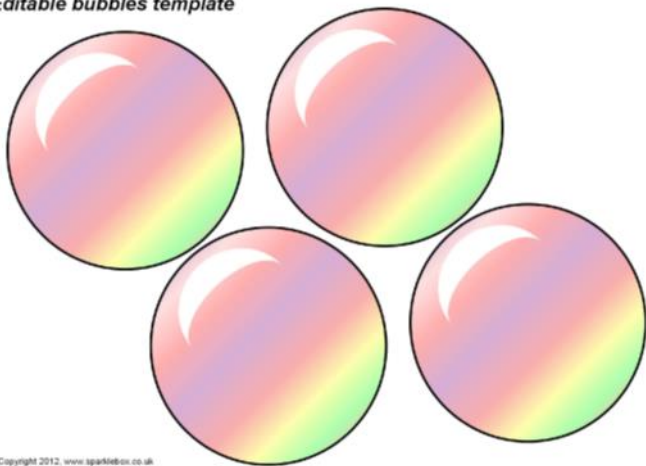

He drank up all the water
And ate a bar of soap.
And now he's in his bed,
With bubbles in his throat.

Bubble, Bubble, Bubble,
Bubble, Bubble, Bubble,
Bubble, Bubble, Bubble
Bubble, PoP!

Counting bubbles

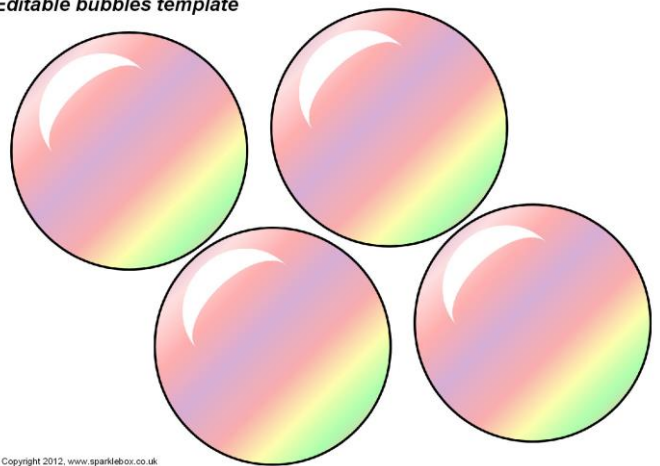

Cut out the bubbles below and use them to play counting games. How many bubbles are there? How many will there be if I take one away? Check and count. Write numbers 1-8 on the bubbles. Can your child recognise the numbers? Can they place them in order from 1-8?
